Referred for TASC Assessment: Completion Date-

No TASC Referral

Veterans Treatment Court (VTC) is a certified Supreme Court of Ohio Specialized Docket with a multi-disciplinary approach made up of criminal justice and behavioral health experts to assist those Veterans with an eligible substance abuse and mental health disorders. This unique team offers services tailored to a shared military experience to make direct and positive differences for veterans. The program is designed to be completed typically within approximately 18 months. A veteran must choose to participate and will move through 4 phases and monitored for compliance by the team, along with random drug testing. Once a veteran has moved through all phases and completed all requirements, there is a Recognition Ceremony held each quarter. For additional information, please review Local Rule 30.3.
